

# Save Iceland

## International Protest Camp Summer 2006

**“Why do we allow a handful of politicians to impose their vision on the future of our heritage, making decisions that will be condemned by generations to come?”**

The summer 2006 Icelandic people and friends of Iceland from all over the world will come together to express their outrage at the corporate conspiracy to make Iceland an El Dorado for heavy industry to exploit and pollute. We plan to ensure that the destruction of the last great pristine wildernesses of Europe will no longer be, in the words of Iceland's Minister for Industry “the multinational aluminium industry's best kept little secret.”

**This is an ecological crime on a global scale, help us stop it NOW!**

This is an unique opportunity to experience some of the weirdest and most wonderful landscapes in the world while demonstrating your solidarity with the campaign. Expect plenty of cultural events and direct action!

You'll find information on how to join the fight and how to get to Iceland on our website at [www.savingiceland.org](http://www.savingiceland.org)
