

Update for Saving Iceland Targets Brochure Spring 2008

Since the 'targets brochure' was produced there have been several changes to the aluminium industry and the brochure is no longer up-to-date. The main changes are that **Rio Tinto Zinc** have bought **Alcan** and merged their own aluminium assets with them to make **Rio Tinto Alcan**, this update includes the facilities that originally belonged to RTZ and are now part of RTA. RTZ announced that they may sell some of the facilities they got with Alcan (mostly the packaging division), so if you're planning an action make sure the target still belongs to RTA.

Glencore who own **Century** (they operate under the name **Nordural** in Iceland) are now part of **United Company Rusal**, meaning that Rusal's facilities are very valid targets for solidarity actions.

Sverige –

United Company Rusal has a smelter at Kubal, address: Kubikenborg Aluminium AB SE-851 76 Sundsvall, Sweden Tel:+46 (60)166100 Managing Director: John Hoerner
